WDD 130 Personal Site plan

(Blake Kenworthy)

Elevator Pitch: My project is a simple, well-organized note-taking website designed as a reusable template for any class or topic. Each page follows a clean structure with headings, summaries, key-point sections, and space for examples, making it easy to create consistent, readable notes. The layout uses color-coding and clear typography so information is easy to scan and review. It ’ s built to help students stay organized and keep their course materials in one place, using a design that ’s reliable, distraction-free, and easy to maintain long-term.

About section

This site is designed as a simple, organized place to create clear and consistent notes for any class or topic. Every page follows the same structure so you can focus on learning instead of formatting. The layout uses clean headings, color-coding, and easy-to-read sections that help you review information quickly and keep everything in one place.

How to Use Section

Each note page includes dedicated sections for the most important parts of learning: key ideas, formulas, examples, rules, and general notes. Choose the template that fits your subject, type directly into the text area, and fill in each section as you study. You can highlight important parts, reorganize your thoughts, and then save or print your notes when you're done. The goal is to make note-taking fast, consistent, and distraction-free so you always have a reliable place to study from.

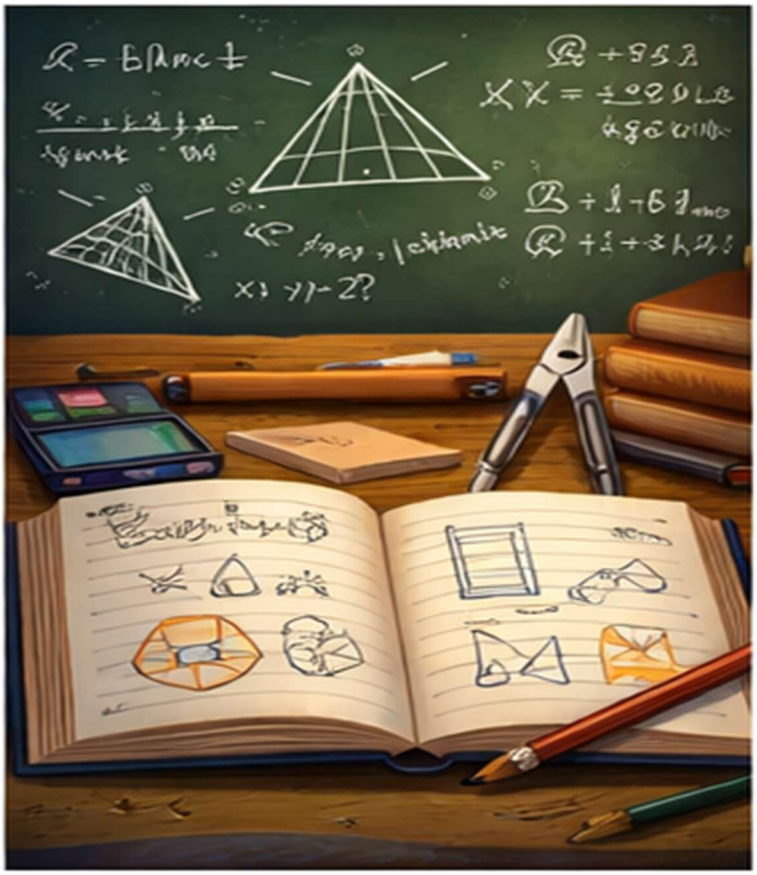
MATH NOTES

==========



Math Notepage

TOPIC

(Purpose: The main idea of the lesson or chapter.)

[User types here]

KEY NOTES

(Purpose: Definitions, important ideas, and concepts.)

- [User types here]
- [User types here]

FORMULAS

(Purpose: Any formulas needed for the topic.)

1) [User types formula]
2) [User types formula]

EXAMPLES

(Purpose: Step-by-step worked problems.)

Example 1: - [User types here]

Work: - [User types here]

Answer: - [User types here]

Example 2: - [User types here]

Work: - [User types here]

Answer: - [User types here]

SECTIONS / BREAKDOWN

(Purpose: Subtopics or parts of the lesson.)

1) [User types here]
2) [User types here]

RULES / MUST-KNOW

(Purpose: Exceptions, restrictions, or important rules.)

- [User types here]

GENERAL NOTES

(Purpose: Extra thoughts, reminders, or observations.)

- [User types here]-

PROGRAMMING NOTES

==========

Programming Notepage

TOPIC / CONCEPT

(Purpose: The programming concept being learned.)

[User types here]

KEY CONCEPTS

(Purpose: Important ideas, definitions, or terms.)

- [User types here]

SYNTAX / PATTERNS

(Purpose: Code structure or syntax examples.)

- [User types here]

EXAMPLES

(Purpose: Code examples with explanations.)

Example 1: - [User types here]

Explanation: - [User types here]

COMMON ERRORS

(Purpose: Mistakes students often make.)

- [User types here]

BEST PRACTICES / RULES

(Purpose: Clean coding habits or rules.)

- [User types here]

GENERAL NOTES

(Purpose: Extra observations or reminders.)

- [User types here]

You can use times new roman generally and georgia for section headers etc.

Background colors:#F5F5F5, F2F4F7, #F7FAFF, #FAFAF7

Accent Colors: #2A5D9F, #F4A340

Also the headers and footers should all be the same if that wasn't obvious
